Art Unit: 1616

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1,4, drawn to a method of administering histamine N-methyltransferase to a patient, classified in class 435, subclass 15.
- II. Claims 19,20, drawn to a method of administering a histamine H3 antagonist such as thioperamide to a patient, classified in class 514, subclass 326.
- III. Claims 21-24, drawn to a method of administering a monoamine oxidase-A agonist such as reserpine to a patient, classified in class 514, subclass 280.

Inventions I and II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different effects.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications restriction for examination is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention: Numerous compounds that are administered to aging patients.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, a method of administering instant compounds to aging patients is generic.

Art Unit: 1616

Applicant is advised that a reply to this requirement must include an identification of the species that is elected (**elect a specific compound to be administered to the patient**) consonant with this requirement, and **a listing of all claims readable thereon, including any claims subsequently added**. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Art Unit: 1616

A telephone call was made to Attorney Hathaway on 5/10/02 to request an oral election to the above restriction requirement, but did not result in an election being made. Note office action dated 9/28/01 is vacated in light of election requirement above.
